SPS Turnover Status Review

RECEIVED BY EVENTS

1. Reference General Hill's note "This SSS was OBE. What is the status since Gen Slay's visit?".

2. Since the meeting with General Slay on 7 Sep 79, the command position on a turnover phase point has been reexamined at the working level. A position has been established whereby ADCOM will agree to turnover prior to POT&E provided that AFSC will agree to a demonstration of the new software with the SPS installed at its operational site location.

3. This position is believed to be in concert with General Slay's comments that movement of the SPS, anomaly correction, and continued support are non-problems. It also resolves the issue of conducting POT&E on AFSC owned equipment.

4. Our next step is to present this position to AFSC/SAMSO and work for concurrence. Clarification of General Slay's comments may be required to arrive at a mutually acceptable position. We will keep you informed of progress.

ORIGINAL SIGNED

WILLIAM R. KENTY, COLONEL, USAF
Asst DCS/Plans and Programs, ADCOM
